8. Standing out of the Crowd

Being a first-year undergraduate student, Standing out of the crowd has always been a question in every individual life. But that's when I've chosen to enhance myself.

When I started to analyze more about myself. I came to know, I'm fascinated by technologies, interacting with like-minded people, and actively taking part in organizing and hosting events.

I've excelled in sports, arts, interactions, communication, etc., in addition to academics.

I always like to explore myself in various fields, searching for opportunities in various aspects, which doesn't just provide me knowledge but in return immense interest to showcase myself in different activities.

With the same enthusiasm, I've learned five programming languages (C++, Python, HTML, CSS, JS) in a span of 2 months and started my journey by contributing to open source.

I've also participated in a few hackathons competing with my seniors and gaining remarkable experience.

-Also Took part in the ISTE student chapter (Indian Society for Technical Education) and received the certificate of appreciation in the reading event "Flick the wrapper".

-Actively participated in our college empathy club for a poster presentation about "Violence against women".

And of course, I never lose a chance to grab an opportunity.

- I've also organized every sports meet that has happened on our school campus.

- Being a team captain, I've always successfully maintained healthy and non-toxic bonds. Which improved my perspective to judge things and enhanced my leadership qualities. (handling evens and odds, making the right decisions in a short time, tackling pressure..)

-As I'm passionate about technology, my dad took me to a few of his seminars conducted by the Department Of Telecommunication. Where I've learned a lot about the latest 5G network, Network Security Systems, Network Installation, Optical Line Terminal, etc.,

-My journey within CodeClause has been marked by numerous achievements. I've successfully integrated a Payment Gateway, crafted a Responsive Unit Converter and contributed to the development of an engaging Responsive Portfolio

Care must be given in filling the application. Incomplete applications / with missing data / without relevant proof / without authorized signatory in any aspect will be rejected without any further communication.

IET CLNYP Academic Excellence Award 2023

Application/Nomination Form

Webpage. These projects collectively showcase my technical prowess and creative spirit. On a broader spectrum, my experiences span beyond CodeClause.

-I've been selected for the prestigious NASA Space Apps Hackathon 2023, addressing the "Learning through the Looking Glass" problem statement on a national level. My achievements also include securing a position of All India Rank 5, State Rank 23, and International Rank 3566 in the Science Olympiad Foundation's International Mathematics Olympiad. The synergy of my skills—ranging from C++, Python, C, and web development tools to time management, problem-solving, and leadership qualities—continues to shape my endeavors.

I've also had the honor of being the Student Representative of the Institution of Engineering and Technology (IET), an experience that adds to my growth and expertise.

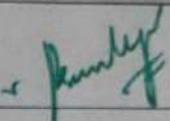

The motto I believe is "On Something New". Which doesn't just signify doing new things, but creating them in a unique way leaving my mark. Because our actions significantly define who we are. An individual certainly needs a consistent mind and determination.

And I think IET will be an amazing platform for aspiring students like me to make a difference in this world.

In essence, my odyssey is one of continuous exploration, learning, and collaboration, where every milestone marks a step toward transforming passion into a lasting legacy

**ROSHNI NEKKANTI
SHRI VISHNU ENGINEERING COLLEGE**

Dear ROSHNI NEKKANTI,
Welcome to CodeClause!

Congratulations! We are delighted to make you an offer as an intern as **Web Development Intern**
Here are the terms and conditions of our offer:

Your scheduled date of internship with us will be from **1-Apr-2023**. If you accept this offer, you will begin your internship with the Company. As an intern, you will receive "temporary employment" status. As a temporary employee, you will not receive any of the employee benefits that regular Company employees receive.

By accepting this offer, you agree that throughout your internship, you will observe all policies and practices governing the conduct of our business and employees, including our policies prohibiting discrimination and harassment. This letter sets forth the complete offer we are extending to you and supersedes and replaces any prior inconsistent statements or discussions. It may be changed only by a subsequent written agreement.

This letter constitutes the complete understanding between you and the Company regarding your internship and supersedes all prior discussions or agreements. This letter may only be modified by a written agreement signed by both of us. I hope that your internship with the Company will be successful and rewarding.

D.O. No. 2-11/2022-Policy 20th June, 2022

Dear Madam / Sir

As you are aware, digital communications infrastructure and service are key enablers and critical determinants to India's growth and well-being. Availability of high-speed broadband to every citizen at affordable cost is the pre-requisite for inclusive and equitable access to opportunities.

2. In order to ensure quality telecom services inside a building, the Ministry of Housing and Urban Affairs(MoHUA) has issued an addendum to Model Building By-Laws, 2016 in March, 2022 regarding provisions for in-building solutions for Digital Communication Infrastructure. A copy of the addendum is enclosed herewith for your convenience and ready reference. The MoHUA has circulated this addendum to all States and UTs with a request to incorporate the mandatory in-building solutions in their respective by-laws.

3. Roll out of 5G is expected soon. Massive deployment of small cells would be needed for effective 5G roll-out. Availability of proper in-building solutions would be required for seamless handover between indoor and outdoor cellular coverage as well as to provide outside coverage to large residential complexes with good Quality of Service.
